

# St. John Valley

## Tobacco-Free Playing Fields & Parks

All below mentioned playing fields and parks have established outdoor policies that prohibit tobacco use on their premises. Please support our efforts to reduce secondhand smoke exposure to all families and most especially, *our youth*.

\*Children exposed to secondhand smoke are most likely to experience increased frequency of:

- Asthma, colds, bronchitis, pneumonia, and other lung diseases
- Middle ear infections
- Sinus infections
- Tooth decay in primary teeth

***The effects can last a lifetime!***
